```python
class Rectangle:
        ⋮

    def diagonal(self):
        return round(sqrt(self.length**2 + self.width**2), 2)
```

```python
class Rectangle:
        ⋮
    @property
    def diagonal(self):
        return round(sqrt(self.length**2 + self.width**2), 2)
```
